

**Our expertise is
your advantage**

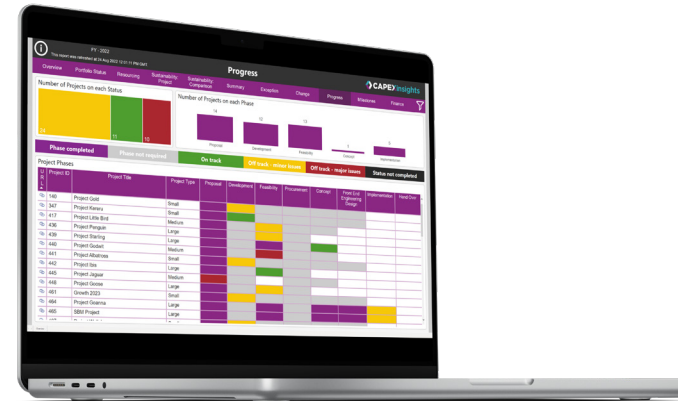

Your complete capital project and portfolio solution

CAPEXinsights seamlessly connects your projects, financials and engineering to provide absolute transparency and control across your capital projects.

€3b euros managed

2500+ users

Used in 100+ countries

CAPEXinsights is a capital project and portfolio management software solution that empowers your people to maximise the success of their capital projects and portfolios.

Simplify the complex with an easy-to-use solution that dynamically translates relevant information along with the optimal framework and processes to suit individual project needs and enable your project teams to achieve better performance.

You can consistently optimise your capital project delivery and portfolio results when you have the ability to make insightful decisions and take decisive action.

We support your entire capital strategy from portfolio build to post-project analysis by improving project delivery, mitigating risk, optimising financial management transparency, and enabling flexible project lifecycles.

Improve your capital investment strategy

Designed specifically for capital projects

Best-practice approach to project and portfolio management

Integrated capital project and portfolio development

Track sustainability and report on your impact

Scalable across small and large projects

Unified project management and financials

Highly configurable and customer-led design

Streamlined pre-CAPEX approval phases

Extensive support and in-app guidance

Simplified compliance balanced with flexibility

Uplift project management capability

Without an efficient framework to maximise capital expenditure there is a risk that many organisations are likely to under deliver on strategy, resulting in missed opportunities and under achievement.

To succeed in competitive markets, capital project teams need a single source of truth to underpin their organizational processes and generate insights to drive performance and gain the leading edge.

Advance your organisation and achieve your capital potential with CAPEXinsights.

The benefits of CAPEXinsights

CAPEXinsights empowers capital project and portfolio teams to achieve their capital potential. As the application of choice for leading global organisations to maximise success across their project and portfolio dimensions.

We combine our extensive expertise in project management and advisory with digital innovation to provide a complete solution that is constantly evolving to meet the needs of our customers.

Engineering

- Visibility of project parameters to manage risk
- Configure project lifecycles to fit project requirements

Project Managers

- Enable consistent outcomes with consistent processes
- Give guidance to project managers that may otherwise inadvertently expose their organisation to risk

Finance

- Access meaningful financial information in real-time to take corrective action
- Assess cost estimation with cashflow forecasting and build reports effortlessly

Executives

- The confidence to know the right projects are undertaken and capital spend is used efficiently ensuring maximum investment certainty
- Consistent processes give assurance that projects are developed with operational rigor to best-practice standards, mitigating risk and aligning to strategic objectives

Portfolio Managers

- Visibility across the entire portfolio from every angle to make decisive decisions
- Maintain strategic alignment with portfolio optimisation and intelligent portfolio spend

Trusted Globally

“Having an innovative product like CAPEXinsights has improved how we manage our Supply Chain Capital Program - from small to large and complex projects. Their expertise, along with our unique processes, gives us the flexibility and transparency to accelerate.”

Born from purpose, driven by curiosity

From the complexity of multiple spreadsheets and working documents to the simplicity of a digital interface, we are always evolving to be exactly what capital project and portfolio teams need to successfully deliver on their capital strategy.

At our core, we empower our customers to be consistently successful with maximum impact.

Our digital expertise, spanning over 25 years, includes award-winning in-house software development teams.

We draw from 100+ years' experience in capital project delivery and engineering design within Beca.

Our people are curious innovators, pioneers of process and seekers of knowledge. We listen to your needs to inform the development of our product, creating a customer-led solution to meet those needs.

As your partner in capital project and portfolio management we work with you to build your capital strategy for a better tomorrow.

Beca is a leading independent advisory, design and engineering professional services firm with over 3600+ professionals globally.

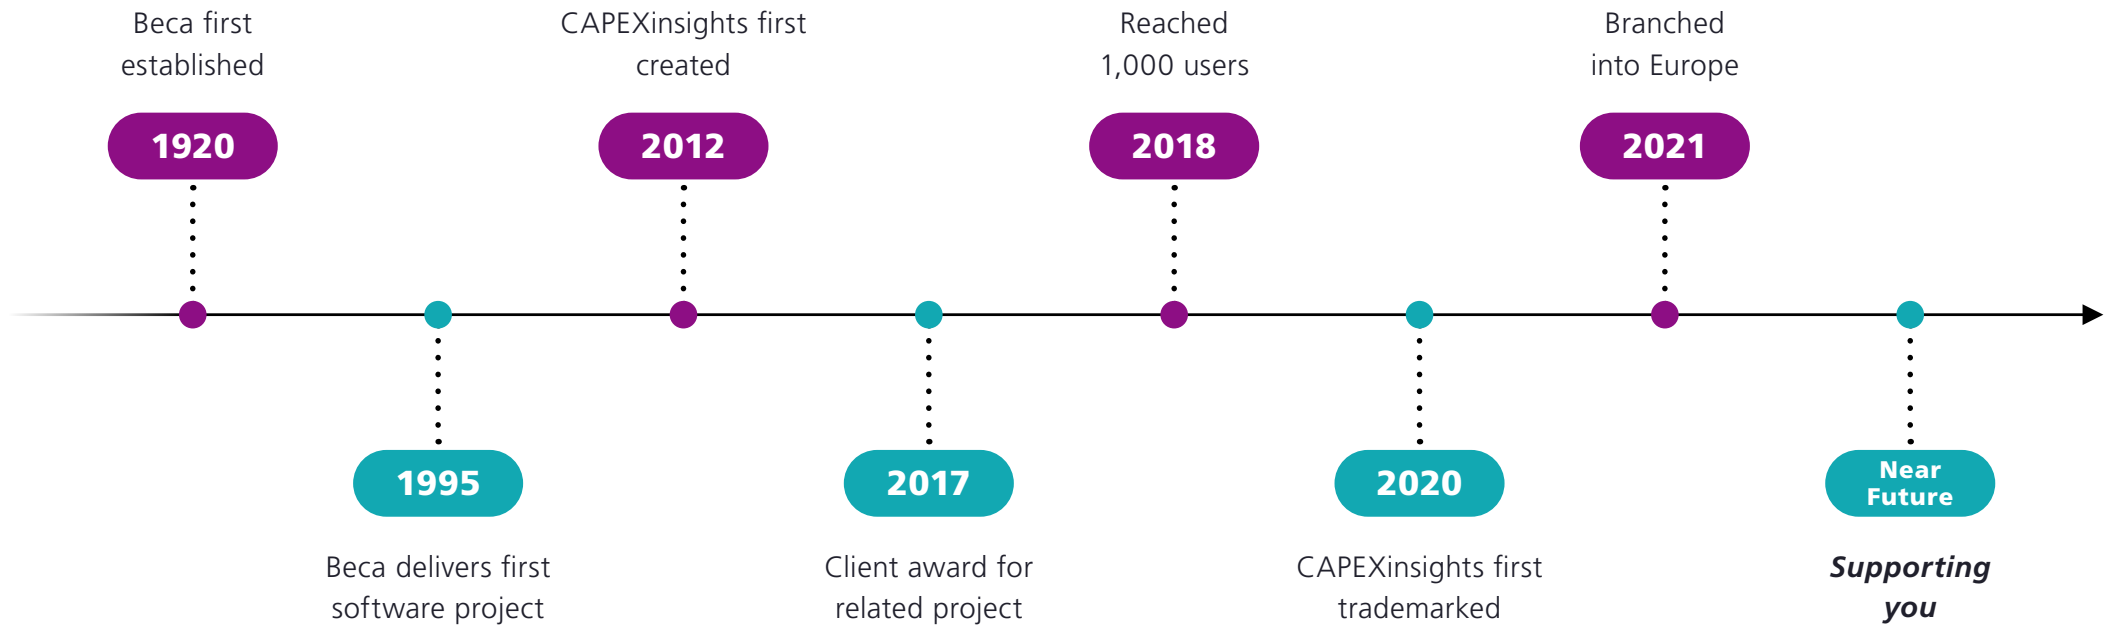

From master planning to implementation across small and large projects, we have been combining our skills and insights with those of our clients to think, design and develop creative solutions together.

We have vast experience from master planning to implementation, across large and small projects.

Together with extensive capital project and portfolio management expertise, we understand best-practice processes and use this knowledge to refine our industrial digital technology solutions.

With a continued curiosity for solving complex problems, underpinned by a deep pool of expertise, CAPEXinsights is anchored by knowledge and experience across people, process, technology and industry.
